
ACADEMIC PLANNING FORM: EARTH & ENVIRONMENT IN ITALY

1. **BEFORE you meet with your academic advisor and major department head, map out your remaining coursework between now and your anticipated graduation date.**
 - This will take some time. Please think through your academic plan in detail.
 - You will earn sixteen credits on this program.
 - Use your Program Evaluation found at *my.luther.edu* to confirm your remaining requirements for graduation.
 - Using the table on the next page, note when you plan to take remaining coursework for your major(s), minor(s), and all-college requirements.
 - You may list the requirement itself, e.g., 2nd religion or human expression, instead of the course title that will fulfill the requirement.

2. **Meet with your academic advisor. Bring the following information to your meeting (online or on paper):**
 - this academic planning sheet with your academic plan already filled out,
 - *my.luther* Program Evaluation,
 - and course descriptions for your program.

3. **Discuss the following with your academic advisor:**
 - How does your program of choice fit your personal, academic, and career goals?
 - Does studying off campus fit into your academic schedule?
 - What courses should you plan to take before and after you study off campus?
 - Though most students who study off campus graduate in four years, part of this discussion with your advisor should include what you will do if you do not earn sufficient credits.
 - If necessary, are you willing to take summer classes at Luther or another college/university?
 - If necessary, are you willing to take an additional semester at Luther?

4. **Meet with your major department head(s) to review your academic plan.**

We understand this is a tentative plan! The goal is to ensure you can complete all necessary coursework to graduate within your goal.

**BEFORE you meet with your academic advisor and major department head,
complete this form to the best of your ability.**
